

Effective weed removal!

TUCHEL-SWEEP

Weed brush for excavators

For
excavators
≤ 6 t

Environmentally friendly and thoroughly!

With the new, hydraulically driven weed brush designed to fit excavators, you are able to remove any kind of weed without any effort and free of chemicals.

The disc brush has a diameter of 750 mm and is equipped with plastic covered rope wire bunches, so that even stubborn plant growth is no longer an obstacle.

Through manually adjusting the tilt angle, you can achieve the highest possible scratch effect.

To prevent stones and debris flying around uncontrollably, an adjustable rubber protection is standard.

Technical data		
Disc brush ø	mm	750
Bristles		Rope wire bunches, plastic covered, screwable, 2-rowed, 44 pieces
Direction of rotation		right / left
Required oil flow		330 l / min at 180 bar
